Adult 200 mg Tablets	-	-	-	-	-	1	1	1.5	2	tablets

## IMPORTANT POINTS:

1. If your child is less than 2 months old and has a rectal temperature > 100.4, call the office before going any further.
2. Be sure to keep track of the times you give each dose. Ibuprofen can be given up to every 6-8 hours. Be careful – children can be overdosed if the doses are given too close together.
3. Do not use ibuprofen for children under 6 months of age. Young babies aren't able to clear the drug from their systems as well as older infants and children.
